For over than 15 years **LLC "KUBITEK"** has been one of the leading concrete producers in Minsk and Minsk region. Since the company's foundation in 2003 and up to now our main and the only activity has been production and supply of ready-mixed concrete and mortar mixes. Over the years of work our company has produced more than 1 000 000 cubic meters of concrete, gained an immense experience and a cohesive team of highly qualified specialists. Along with the full range of our own modern high-tech productive capacities this allows us to produce concrete of the most diverse composition and to supply it to the objects of any level of complexity.

Our capacities:

- 3 mortar-concrete units produced in Germany (Liebherr) and Italy (CIFA S.p.A.), which capacities correspond to the production output of 120 m³ / h. It's fair to say that our concrete mixing units range among the most advanced and high-tech concrete complexes in Minsk region.
- We work without days off and holidays 24 hours a day all year round, regardless of weather conditions.
- The base of cement handling and storage is located near the Moscow Ring Road. Due to a large delivery of wagons, a short arm (transportation) from the railway station, impressive storage facilities and operation of powerful compressor units the workers are able to receive cement by railway transport and at the same time to release transport vehicles with the capacity of 60 tons per hour.
- We have 16 units of modern truck mixers with the volume from 6 to 9 cubic meters for concrete delivery, as well as auto (truck mounted) concrete pumps for pumping the concrete to the height of 43 m with the length of boom from 42m to 52m.

LLC "Kubitek Zhelezobeton" has a reputation for producing only high-quality concrete. Our own certified laboratory with modern equipment controls the quality of the mixtures produced.

Our awards: "The best building product of the year-2005"

; -2017"

Our objects:

- IFC Galleria Minsk on Pobediteley Avenue (LLC "Renkons") 2013-2016;
